

I am grateful to have received an ARVO Foundation for Eye Research/Retina Research Foundation/Joseph M. and Eula C. Lawrence Travel Grant. This travel grant made it possible for me to present my MD/PhD research project which involved the testing of a novel adult stem cell based therapy in models of retinal degeneration. We received a great deal of interest from scientists, clinicians, and representatives from industry. Thank you for providing the opportunity for me to take part in ARVO 2011 in such a meaningful way.
